CARBON REDUCTION PLAN

Supplier name: JGP Resourcing LTD

Publication date: 20th December 2022

COMMITMENT TO ACHIEVING NET ZERO

JGP RESOURCING LTD IS COMMITTED TO
ACHIEVING NET ZERO EMISSIONS BY
2050

BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021/2022	
Additional Details relating to the Baseline Emissions calculations.	
This is JGP Resourcing's first emissions reporting. The following section, therefore, includes the figures for 2021 and will be used as our baseline calculations.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	ZERO – We do not have any company vehicles
Scope 2	82
Scope 3	7.6

(Included Sources)	
Total Emissions	89.6

EMISSIONS REDUCTION TARGETS

We have engaged Carbon Neutral Britain to measure and calculate our carbon footprint for 2021/2022, with the purpose of offsetting our total organisation emissions to become Carbon Neutral.

Carbon Neutral Status has been awarded to the organisation for a period of 12 months from January 2023.

CARBON REDUCTION PROJECTS

We are a services business, during the pandemic we moved to a working from home model which will continue in future years. This has reduced the amount of carbon we produced by not owning an office or company vehicle. This has enabled us to be paperless and move everything online.

In the future, we hope to implement further measures such as:

- Supporting the Tree Council to plant at least 200 trees for the next 2 years.
- Continue to use public transport to commute if needed.
- Through the Carbon Neutral Britain Woodland Fund™, JGP Resourcing Ltd has offset its total carbon emissions through internationally certified carbon offsetting projects.

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
